The Customizable Tool Palette is used to organize frequently used commands into shortcut tabs for quick access. While there are many shortcut tabs available, only a select few are designed to work exclusively with the Torchmate CAD. The following is a list of the tools available in the Standard Torchmate CAD program.

New	Make Path	Select All
Open	Break Path	Select None
Save	Edit Path	Show Rulers
Import	Edit Tool Path	Material Size
Export	Delete Tool Path	Close Graphics
Undo	Show Tool Paths	Show Grid
Redo	Show Tool Paths Only	Show Grid as Lines
Exit	Render to Bitmap	Snap to Grid
Print	Convert to Curves	Inverse Select
Array	Text to Graphics	
Rotate	Calculator	

In the Pro Text Compose Module, these tools are also available.
Fit Text to Graphics   Fit Text to Path   Fit Object to Path

To add or delete shortcut tabs, right click on the palette to open the Customize Toolbar window, select an option, and then move it to or from the current toolbar as seen below.
